

STOUT AGTECH

PROVIDING FARMERS WITH TECHNOLOGY AND DATA TO IMPROVE FARMING GLOBALLY

ABOUT STOUT AGTECH

Today, farmers are facing more challenges in our agriculture industry than ever. Stout AgTech collaborates with farmers to design, build and launch farming solutions that will keep up with the fast pace of farming for generations to come. We empower farmers with easy-to-incorporate, reliable farming tools that help to address critical demands in areas such as:

LABOR REDUCTION
Supplements Shortages & Decreases Costs

SUSTAINABILITY
Decreases Environmental Impact

FLEXIBLE AUTOMATION
Easy Set-up & Configuration

Stout AgTech is helping farmers solve the next generation of challenges so that they can continue their legacy of providing healthy nutrition to an ever-growing population.

THE SMART CULTIVATOR

First of many innovative solutions to come, our Smart Cultivator uses artificial intelligence to identify and remove unwanted weeds from the field. While the visual learning software is progressive and high tech, the machine is a farm implement that is easy to add to existing farm equipment – allowing farmers to hit the ground running, saving on labor and input costs from day one, with little to no down time.
